

A Franklin Electric Company, USA

YOUR PARTNER FOR WATER SYSTEM

FIXED AND VARIABLE SPEED BOOSTER SETS

Booster sets consisting of several identical electric pumps coupled in parallel by manifolds, shut-off valves, check valves and fixed on a single base. The electric pumps are controlled by an electric control panel and pressure switches for fixed-speed sets, or by one or dedicated VFD for each electric pump for variable speed sets.

APPLICATIONS:

- Small domestic and industrial plants/ Domestic water
- Water distribution and pressure increase supply
- Irrigation / Gardening / Rainwater collection
- Industrial plants / Washing units
- Cooling and refrigeration / Heating and conditioning / Air conditioning
- Various other installations systems

FEATURES:

- Compact design
- Easy installation: all sets are assembled, wired and tested
- Suitable for pumping clear fluids at the factory

ADVANTAGE:

- Cost Saving
- Energy Efficient
- Soft Start And Stop
- Eliminate Maintenance Cost

AVAILABLE VERSION:

- Different materials for manifolds, check valves shut-off valves
